## NORMS FOLLOWED FOR FIXING FEE

The school fee is determined after considering several factors, including the general capacity of parents to pay, guidelines issued by the CBSE and the State Government, and the average pay scales offered in private schools. Other considerations include the need to maintain an annual balance between the school's income and expenditure, provision for a reserve fund, allocation to the contingency fund, and similar requirements. Additionally, the latest infrastructure and facilities provided by the school play a significant role in deciding the quantum of fees.
